STEYR MONOBLOC

The new STEYR MONOBLOC sets new standards for innovative hunting rifles – you can find all details about the STEYR MONOBLOC in a separate price list.

RELIABILITY

An all-metal weapon for absolute robustness made accordingly to military standards

PRECISION

New "monobloc" construction, in which barrel and housing are hammer forged out of one piece of steel

ERGONOMICS

Top ergonomic stock with numerous, innovative options to adapt

SAFETY

State of the art safety features such as hand cocking system, bolt lock and removable trigger unit

MANNOX® surface

MANNOX® - the new innovative surface of STEYR MANNLICHER

In the course of permanent product improvement, STEYR ARMS has established a new innovative surface for all products during 2006. The new MANNOX surface combines a matt deluxe, black optic with outstanding functional preferences:

- 100% corrosion resistance!
The new surface is absolutely non-sensitive against rain, humidity, sweat and game blood.
- Highest resistance against rubbing!
The new surface avoids from abrasion or damaging of the outer metallparts in the daily use through f.e. clothes, backpack slings, etc.
- Minimum reflection!
The matt deluxe, black surface avoids reflections of sun and moon rays. Thanks to that the rifle is not noticeable for the game.

STEYR MANNLICHER SM 12®
with MANNOX® surface

The 2+1 Safety System

Safe Position

In this position the weapon can be loaded and unloaded. The trigger is locked, which prevents unintentionally firing.

Fire Position

Just before you intend to shoot, you roll the safety wheel noiseless forward from the Safe Position into the Fire Position.

Optional: Locking Position

A button on the safety wheel prevents the unwanted rolling of the safety wheel from the Locking Position into another position. Trigger and bolt are locked. Depressing the bolt into its lowest position additionally locks the fire pin, too. "Set Triggers" are automatically unlocked in this position.

All safety positions can be easily operated, ambidextrous, function noiseless, and are ergonomically positioned on top of the rifle's pistol grip.

H.C.S.™ the hand cocking system of the STEYR MANNLICHER SM 12®

The ergonomic and easy to operate hand cocking system (H.C.S.™) sets new standards for all hunting situations.

The weapon is in safe position. A set trigger is automatically unlocked

The weapon is ready to fire, the firing pin is cocked.

STEYR ARMS PRICE LIST 2021

STEYR Safe Bolt System (SBS)

The SBS (Safe Bolt System) from STEYR ARMS.

The STEYR ARMS invention and patented SBS (Safe Bolt System) is said to be the safest rifle concept worldwide. The Shooter is always protected against outgoing gas and weapon blasts even in case of unexpected overpressure. This maximum of safety is based on the following:

Ice and residue grooves

Special grooves machined into the bolt guarantees the reliable operation of the rifle, even under extreme environmental conditions, such as mud or ice.

Firing pin

At the rear of the Bolt the firing pin indicates the cocked position – touchable and visible.

Bolt head

The front locking lugs of the SBS are extremely massive by design, which lock directly behind the cartridge case into the receiver

Bolt Handle

The Bolt handle also locks into the receiver.

Safety Bushing

Only the patented SBS uses an additional safety bushing, which fully encases the lugs and extractor.

In essence, the shooter is fully protected against escaping, high pressure gases, in case an over pressure round is unintentionally fired. Therefore, the SBS effectively prevents the rupturing of the rifle's receiver

Left: Lock bushing without safety bushing

Right: Lock bushing with safety bushing

An overview of all the advantages

Enhanced Safety

- The magazine can be set to an additional lower position to assure that no round is fed when cycling the bolt.
- In locking position the set trigger is automatically decocked and cannot be reactivated until the safety is taken off again. The same happens when decocking the H.C.S.™
- In the locking position the firing pin can be blocked completely by depressing the bolt in the lowest position (only models with 2+1 stage safety)
- User friendly 2+1 safety. The bolt can only be removed and reinstalled when the safety is on.

Enhanced Reliability

- All safety related components of the lock bolt are arranged inside and protected against dirt and dust.
- Absolute reliability at temperatures ranging from +70°C to -40°C.
- The ice and residue groove on the bolt body also adds to its top functionality even under the most adverse conditions.
- The SBS front locking system enhances the reliability at high chamber pressures.
- The four point magazine catch design ensures perfect feeding at all times.

Enhanced Comfort

- The double-column magazine is easy to load.
- 70° locking angle only due to the dual lug twin row lockbolt design
- When the firing pin is secured the bolt handle rests closely at the stock and automatically flips back in position when safety is deactivated.
- The firing position allows rapid reloading to facilitate a fast follow-up shot if needed.

STEYR ARMS PRICE LIST 2021

STEYR MANNLICHER SM12® 150 YEARS STEYR MANNLICHER – THE LIMITED EDITION

The STEYR MANNLICHER SM12® 150 years is an elegant piece of art, limited to **150 pcs.** world wide. With our historical logos, the model name on the receiver and the serial number which is the same as the number of the rifle (1/150, 2/150,...) encompassed with real gold inlays and a cold hammer forged double octagon barrel we create a piece of art for 150 STEYR ARMS enthusiasts.

The rifle is delivered in an elegant leather case, with a STEYR ARMS sling and a certificate and is available in .30-06 Spr. and .300 Win. Mag.

STEYR MANNLICHER SM12® 150 YEARS STEYR ARMS

Caliber	Material Number	Suggested Retail Price in €
.30-06 Spr.	66.03500.000000J	7.332,--
.300 Win. Mag.	66.04830.000000J	7.332,--

STEYR ARMS LEAD FREE EDITION

Following our tradition to innovate, STEYR ARMS takes the challenges of the future and presents with its lead free editions, the first rifles especially designed for today's standard lead free ammunition. The new barrel profile with six lands and grooves is optimized for solids. The less flexible solids proceed much more evenly into the barrel due to the smaller diameter of the fields. Lead free editions are available for the STEYR MANNLICHER SM12® and STEYR MANNLICHER CL II models, in .30-06 Spr. More calibers to come!

For faster recognition, the Laser engraving on the Receiver is green coloured and the serialnumbers start with LF.

Surcharge for the Lead Free Edition is EUR 175,- (Suggested Retail Price)

STEYR MANNLICHER RESET ACTION FOR SM12®

With its brand new Reset Action STEYR ARMS sets benchmarks for the safety of modern rifles.

An integrated inclination sensor knows when the rifle is moved out of a shooting position and is still cocked. In case the shooter forgets to decock an LED signal draws the shooters attention to the fact that the rifle is still cocked and unsafe.

If the shooter does not un-cock the rifle manually, the RESET ACTION system does that automatically and prevents serious accidents which could occur with a cocked rifle.

STEYR ARMS makes a contribution to safety of modern rifles with its RESET ACTION system.

An electronic sensor reacts if the rifle is lifted up over an angle of more than 100° or is tilted sideways under 55°.

In case of a total flip over where the weapon gets upside down the system decocks immediatly.

The power of the RESET ACTION lasts up to 5 years – after that batteries have to be changed. When the batteries are empty the rifle can be used like every other STEYR MANNLICHER SM12®

Reset Action is available for all STEYR MANNLICHER SM12® models. (except SX-models)

Surcharge for the Reset Action System is EUR 600,- (Suggested retail price)

NEW! STEYR BREEZER

Steyr Arms introduces a new generation of silencers – the STEYR BREEZER.

The STEYR BREEZER is available in 2 different versions as a thread on silencer (STEYR BREEZER MSD) and as an overbarrel silencer (STEYR BREEZER OSD).

For the STEYR AUG we are happy to offer the STEYR UMS (Universal Military Suppressor) with a QD-mount for the STEYR AUG muzzle device.

STEYR UMS

STEYR ARMS PRICE LIST 2021

TECHNICAL DATA STEYR BREEZER

STEYR BREEZER MSD:

Length: 207mm – added length to the weapon: 192mm
 Width: 45mm
 Weight: 420g
 Approx. sound suppression: 33 db (A)

STEYR BREEZER OSD:

Length: 228mm – added length to the weapon: 146mm
 Width: 45mm
 Weight: 425g
 Approx. sound suppression: 33 db (A)

Thread adapters are now available for gunsmiths. The thread adapter has to be screwed in tight and fixed with Loctite 648 (or a similar heat resistant glue).

The Adapters are available from M18x1 to M14x1, M15x1 or 1/2-20 UNF.

STEYR MANNLICHER CL II

The successor of the famous MANNLICHER CLASSIC: the STEYR MANNLICHER CL II.

The technical features including the patented SBS™ (safe bolt system) coupled with the new, elegant and ergonomical optimized stock which gives it the highest comfort with a maximum on precision and reliability. This is the quality STEYR ARMS is well known for.

The stock with Bavarian cheek piece and double flame, elegant checkering is optimized for the use with scopes.

STEYR ARMS's O.B.P.™ (optimize barrel profile) guarantees highest precision thanks to its optimized contour and length and fits perfectly into the new designed stock.

The combination of the new barrel and slim housing design are giving the STEYR MANNLICHER CL II an elegant look.

All STEYR MANNLICHER CLII without open sights are factory threaded (M15x1, Semi Weight M18x1)

STEYR CARBON for SM12 and CL II models

STEYR CARBON with Flexsight and Picatinny rail

For various SM12 and CL II models we now offer a Carbon Fibre version – the STEYR CARBON. With its lightweight and robust new designed Carbon Fibre stock the new STEYR CARBON is a desirable rifle for the modern hunter as well as for the demanding sport shooter.

All STEYR Carbon rifles are equipped with a special muzzle thread that allows mounting the new STEYR FlexSight.

Thread sizes:

- M15x1 for Standard and light barrels
- 5/28-24 UNEF for 6,5 Creedmoor
- M18x1 for .338 Lap.Mag.

The STEYR CARBON is available in the following models and calibers:

- STEYR CARBON SM12 or CL II Halfstock in .308 Win., .270 Win., .30-06 Spr. and .300 Win.Mag.
- STEYR CARBON SM12 or CL II Light in 308 Win., .270 Win., .30-06 Spr
- STEYR CARBON SM12 or CL II Heavy barrel in 6,5 Creedmoor or .338 Lap.Mag.

The STEYR CARBON is delivered in a special gun bag, a STEYR CARBON Cap and Notebook.

STEYR ARMS PRICE LIST 2021

CUSTOM SHOP for STEYR MANNLICHER SM 12® and CL II

STEYR ARMS revives the century old, highly exclusive technique of coloured case hardening. The Antique models unite traditional finish with state-of-the-art arms technology.

The visually pleasing Antique models comprise a special coloured case hardening finish of housing, bolt handle, breech plug cap, magazine cover, screw base, trigger guard, rear sight base and front sight base.

In addition, barrel and system screws get a blued finish.

Besides the ostensible idea of visually pleasing design, this type of surface treatment entails technical advantages too. The process of hardening causes extremely hard surface conditions of the treated parts, which entails a higher wear resistance. Components treated this way have a higher resistance against corrosion and mechanical stress.

The "Antique" models combine exquisite design, first class quality, long lifetime and excellent precision in one exclusive rifle.

With this novelty we want to accommodate the requirements of our customers with exalted requirements.

Engravings

In by gone times, hunting was a privilege enjoyed only by kings and nobility. Naturally, they only appreciated equipment of the best quality. It is no wonder that for many centuries hunting weapons have been embellished and decorated with engravings.

Today hunting weapons are valued as jewels and investment for many huntsmen. Thus, any decoration or ornament will add to the individual value of their weapon. They are visible expressions of the special importance hunting has in the life of the hunter.

Pistolgrip cap with engraved game head

For detailed information concerning the engravings available, please contact your Area Sales Manager.

Information for threading barrels:

All rifles from 1996 (SBS) onwards can be threaded as well as all Mannlicher Luxus old model (before 1996). All other Steyr rifles (fe. Steyr Mannlicher S, M, I and SL models) can not be used with silencers and will therefore not be threaded.

For rifles with open sights please note that the front sight is removed and will not be placed on another position. Therefore, a silver marking on the barrel (where the sight was welded to the barrel) will remain visible.

NEW! STEYR PRO VARMINT

The new STEYR PRO VARMINT is a rifle that combines high fire rates with the proverbial precision of STEYR ARMS. Thanks to that it's the ideal rifle for Varmint shooting, training and competitions at the shooting range. The STEYR PRO VARMINT comes with a highly accurate, cold hammer forged, fluted heavy barrel in stainless. Every rifle is run in the factory which allows superb accuracy out of the box.

The STEYR PRO VARMINT is factory equipped with a Picatinny rail (Mil. Std. 1913 rail), which allows easy mounting of different optics and aiming devices. The bolt handle is designed for fast repeating and the adjustable cheek piece gives a maximum of stability in any shooting position.

Available in the calibers .222 Rem. and .223 Rem., .22-250 Rem, 243 Win. and .308 Win.

STEYR SCOUT

With a total length of 98 cm and a weight of just 3 kg the STEYR SCOUT is extremely light and compact. The locking mechanism is based on the SBS (Safe Bolt System).

The three positioned roller safety switch rides on the center line of the tang. Both 5- and 10-round (adapter necessary) detachable box magazines may be used. Advanced handling characteristics, a perfect trigger and traditional STEYR ARMS precision combined with unbeatable usability make the STEYR SCOUT rifle the ideal weapon system for fast target acquisition and engagement.

The stock features a spare magazine in the butt stock. The receiver includes flip-up emergency sights.

The bipod integrated in the fore-end stock can be deployed when needed.

Information for the Long Rail system for STEYR SSG 04-A1:

Please note that the serial number has to be lasered in the longrail system before attaching it to a rifle! For example by mounting it on a STEYR SSG 04. Therefore the rifle has to be sent to our work shop!

STEYR ELITE

STEYR ELITE – The ultimate precision rifle, based on the SBS-system.

Utmost accuracy and safety and yet even more comfortable to use, this rifle meets the marksman's highest demands.

- The locking system bases on the approved system SBS
- The bipod integrated in the fore-end stock can be deployed when needed.
- All bipods available on the market can be mounted on the Nato standard rail integrated in the fore-end stock
- Long Picatinnyrail allows a wide range of optical sights to be mounted.

STEYR HS .50 AND STEYR HS .460

The STEYR HS .50 is a long range, high precision rifle, with an effective range of up to 1,640 yards (1,500 m).

It was designed as a single shot bolt action rifle, and is available in the caliber .50 BMG.

The STEYR HS .50 features a cold hammer forged fluted barrel, adjustable bipod, and a highly efficient muzzle brake, which reduces recoil substantially to increase shooting comfort.

The top mounted Picatinny rail (Mil. Std. 1913 rail) allows quick and easy installation of various optics, or night vision devices.

The STEYR HS .50 is designed to field strip easily for transportation or maintenance purposes.

Now also available in the new caliber .460 Steyr.

Stock	Synthetic black.

The STEYR AUG Z is the civilian Version of the world-famous STEYR AUG. It is a gas-operated semi automatic rifle with a picatinny rail (Mil. Std. 1913 rail) which allows quick attachment of various optic devices.

The "Bull Pup" Design makes it a short handy rifle with high reliability and accuracy.

The STEYR AUG series is famous for its modular concept which permits field stripping into the main groups within a few seconds.

The cold hammer forged, chrome-lined barrel with a twist length 1" in 9" which guaranties high reliability.

STEYR PISTOLS

The STEYR PISTOLS are exactly what a handgun should be regarding performance, safety and reliability. Aiming at the future!

Their revolutionary design and safety features, including the unique lockable safety system in a self-loading pistol, place the STEYR PISTOLS light years ahead of their competitors.

STEYR ARMS Pistols are world-famous for its future-orientated design and technology as well as ultimate ergonomics and proverbial precision.

The innovative grip frame offers unmatched ergonomics for best pointing characteristics and is equipped with interchangeable backstraps and side plates to configure the grip to the individual shooters hand.

The real Picatinny rail on the lower front frame allows mounting a wide range of white lights and laser aiming devices.

Fast and precise target acquisition due to the innovative triangular/trapezoid sights (also other sights available) and the unique lockable safety system make this semi-automatic pistol what a handgun should be in modern times.

STEYR ARMS has long been known as the leader in the utilisation of advanced synthetics for firearms. Also the materials used in the ultra-rigid frame of this new pistol represent the state-of-the art in the world of handguns.

Not only ergonomics was in the foreground during the development process of the STEYR PISTOLS. Also safety was an important point same as it is on all STEYR ARMS products.

The STEYR PISTOLS are available with two resp. three safety conditions optional:

- *Automatic Trigger- Drop- Firing Pin Safety Mechanism* – In this condition the pistol is safe until the moment the trigger is pulled.
- *Integrated limited access lock with key* - The integrated locking function is activated by a key and prevents firing and disassembling of the pistol.
- *Optional Manual Safety* – Can be activated manually, according to the user's needs. The safety catch can be quickly deactivated by the trigger finger. And the Best it's free of charge.

STEYR ARE products are unbeatable in quality and reliability. Due to their world-wide acclaim of producing the most accurate and durable executive self-defence and hunting firearms, it's no surprise that the pistol series meet these standards as well.

STEYR PISTOLS Safety

Safety Condition 1

Automatic Trigger- Drop-Firing Pin Safety Mechanism. In this condition the pistol is safe until the moment the trigger is pulled.

Safety Condition 2

Optional Manual Safety. Can be activated manually, according to the user's needs. The safety catch can be quickly deactivated by the trigger finger.

Safety Condition 3

Integrated limited access lock with key. The integrated locking function is activated by a key and prevents firing and dis-assembling of the pistol.

NEW! STEYR PISTOL A2 MF SERIES

The newly designed STEYR PISTOL A2 MF is the newest member in the STEYR ARMS product family. It is available in 3 sizes – (L-Large; M-Medium and C-Compact) with 17rnd magazine, a real picatinny rail (MilStd. 1913) at the forend and a fully adjustable grip. The back strap as well as both sides of the grip are adjustable with different sized inlays to adjust it to the shooters hand. The grip also features a funnel for a quick magazine change. The Pistol is delivered with 3 backstraps and side plates (S, M, L)

GENERAL TERMS OF DELIVERY AND PAYMENT

General

Our supplies and services shall be governed exclusively by the following terms. Buyer's purchasing conditions or modifications of the present terms of delivery, as well as any other agreements shall not be binding on us unless we have accepted them in writing.

Offers

Our offers are non binding; together with relevant enclosures, samples and descriptions they are our property and may not be reproduced or made accessible to third parties without our consent. We are free to demand their return at any time, and such return shall be effected without our request if the buyer places his order elsewhere.

Conclusion of contract

The Contract is deemed to be concluded when upon receiving an order we have dispatched a written acknowledgement of order. Modifications and additions to the Contract as well as verbal promises made by our representatives are not binding unless confirmed by us in writing.

Should import or export licences, foreign exchange permits or similar permits be required for the fulfilment of the Contract, the customer shall undertake all reasonable efforts to obtain the requisite licences or permits in due course.

Prices and payments

All prices are quoted in Euro, excluding value added tax ex-works. Loading, transport costs, transport insurance and expenditure for environmental protection shall be invoiced separately. We reserve to raise our prices adequately if after the conclusion of the contract cost increases occur, especially when caused by price increases at our suppliers' end or by fluctuations of the exchange rate.

Payment is due promptly upon invoicing without any deduction. Cheques will be accepted on account of performance. We reserve to perform deliveries against advance payment or C.O.D. only.

The customer shall not be entitled to withhold payments owing to warranty claims or other counterclaims not recognised by us. In case of default of payment we shall be entitled to interest at 5 % above the three-months EURIBOR, as well as to a dunning charge of 10.- Euro per reminder and the refund of lawyer's fees in the context of dunning notices.

Minimum Order Values

For orders received below an invoice value of € 40, excl. VAT a minimum order sum of € 40, is charged.

Return of Goods

STEYR ARMS PRICE LIST 2021

For the handling of returns a handling fee of € 40, per returned item is charged. Excluded from this are returns in the context of warranty claims.

Reservation of ownership

Until full payment has been made, including any subsidiary claims, the goods supplied shall remain our property. The right of property shall pass to the customer only after the latter has fulfilled all his liabilities with us. In the event of a resale our reservation of ownership shall extend to the customer's claim arising from such sale, which shall be transferred to us. If the client collects the claim himself, this is done on a purely fiduciary basis, and the claim so collected shall be transferred to us up to the amount of our demands.

We shall be entitled, at any time, to inform the buyer (who upon our request shall be named to us by the customer) of the assignment of the claim and to request him to make payment to us.

The customer may not pledge the reserved goods or transfer them by way of security. The customer shall be obliged to inform third parties in the event of the reserved goods being pledged or seized, to notify us without delay and to support us in the defence of our property rights. The customer shall irrevocably authorize us to procure the reserved goods at any time even without legal aid in case the customer commits a violation of the Contract.

Delivery periods

The stipulated delivery times are decisive for determining the date of delivery ex-works. The delivery time shall be reasonably prolonged if the customer does not honour his obligations or if unforeseen or extraordinary events or events arising through no fault of ours occur in our works or the works of one of our sub-suppliers, such as war, mobilization, natural disasters or strikes.

A delivery date shall not be deemed fixed unless it has been explicitly designated so in writing. If we defer delivery for more than eight weeks, the customer may rescind the contract after a reasonable extension fixed in writing, excluding any further claims.

Passage of risk

The risk shall pass to the customer upon delivery of the goods ex-works to the customer or the carrier, its agent or other persons named to us. Should delivery be deferred or become impossible without any fault of ours, the passage of risk shall coincide with the notice of readiness for dispatch.

Cancellations

We shall not accept the cancellation of firm orders which have been produced specially on account of their design or quantity, unless there are legal grounds for a rescission.

For cancellations concerning standard goods we charge a fee of 20 % of the net invoice value. If any changes occur in the person of the customer, or if following the conclusion of the contract we learn of facts which in our view impair the creditworthiness of the customer, and if the customer refuses to make advance payment or to provide security, we shall be entitled to rescind the contract.

Warranty

STEYR ARMS PRICE LIST 2021

- .1. Under warranty as provided by law we declare that our products are free from defects as corresponds to the state-of-the-art, that all services rendered by us are free from deficiencies in title and fully comply with the contractual characteristics.
- .2. The warranty period shall be two years from the delivery.
- .3. If within such period the customer detects any defect, he shall report it to us in writing without delay but no later than one month from its recognisability, accompanied by a detailed description of the fault and appropriate delivery documents. Failure to report within the above period shall entail the loss of any warranty claims.
In the event of no complaint being lodged or a complaint not being lodged in due time, the goods shall be deemed to be accepted. In such event, no claims for warranty or damages or pleads of error connected with defects can be granted.
This restriction shall not apply to consumer contracts.
- .4. Defective goods shall be returned to us.
- .5. Defects shall be remedied in the following order:
 1. Repair
 2. Replacement of the defective part
 3. Replacement of the defective goods
 4. Price reductionWe reserve the right to decline the repair or replacement of goods, offering a price reduction instead or – in the case of defects not classified as minor ones as per § 932 par. 4 ABGB (Civil Code) – cancellation of sale, if the repair or replacement would be impossible or would mean a disproportionate expenditure for us.
- .6. The repair of a defect shall not have the effect of prolonging the warranty period.
- .7. No responsibility will be accepted for defects known to the customer or patent defects. Nor will any warranty be granted for defects caused by wear and tear or abrasion due to operation and normal use, by inappropriate use or operating errors or by the fact that serial numbers have been removed. If the customer continues to use the goods despite his knowledge of a cause for cancellation of sale, this shall constitute a waiver of warranty *ex post facto* which shall exempt us from any obligations in that respect.
- .8. Unless otherwise provided for in the present clauses, any further claims of the customer – under any title whatsoever – shall be excluded. We therefore shall not answer for damages not arising from the object of the delivery itself; this shall apply particularly to loss of profits or other damage to customer's property. This exclusion shall also extend to claims for *in contrahendo* fault, violation of accessory obligations and producer's liability. Likewise, we shall not accept liability for incorrect information in brochures, catalogues and other written material. This release from liability shall not apply if damage has been caused intentionally.
In case we have negligently violated a substantial contractual duty, our obligation to render compensation for damage to property or persons shall be limited to the scope of our product liability insurance. In any case, the obligation to render compensation shall be restricted to damages foreseeable at the time of contract conclusion. In the case of consumer contracts, § 1298 ABGB shall apply regarding the burden of proof. Moreover, the restriction of liability shall not be applicable to personal injury in the case of consumer contracts.
- .9. The above exclusions and limitations of liability shall be ineffective for claims covered by product liability law or in instances of initial incapacity or impossibility to perform for which we are

STEYR ARMS PRICE LIST 2021

answerable. Any exclusion or limitation of our liability shall extend to the personal liability of our employees, workers, collaborators, representatives and persons employed in performing an obligation.

The Product Liability Act (PHG) shall apply with the limitation that in our relationship with the customer we are exempt from reimbursement according to the PHG. The customer shall be obliged to pass this exclusion on to his clients, to avoid possible recourse. Liability for slight negligence shall be excluded.

- .10. Consumers shall be covered without restrictions by the legal warranty regulations of the ABGB (Civil Code) in conjunction with the provisions of the Consumer Protection Act.

Unlawfulness of assignment and set-off

The customer shall not be entitled to assign to third parties his claims arising from this contract. Furthermore, he shall not be entitled to set off our demands against any counterclaims. By contrast, any clauses contained in the General Business and Purchase Terms of our customer and relating to the unlawfulness of assignment and all other contract clauses concerning the assignment of debts shall be null and void.

General clauses

Our contracts shall be governed by Austrian law. The exclusive place of jurisdiction shall be the court competent for our works in STEYR and having jurisdiction over the subject matter .

The order will be handled with the aid of automatic data processing. The customer shall grant his express consent to the processing of the data obtained by us within the framework of our contractual relations and required for the handling of the order.

In the event that any provision or provisions of these General Business Terms is or becomes ineffective, or if the present contract text fails to provide regulation in a particular matter, the parties to the contract shall replace or complete the ineffective or incomplete provision or provisions by some other adequate regulation, striving to come as close to the economic purpose of the intended regulation as possible. The validity of the other provisions shall remain unaffected.
